Dear 11th grade parents and students,

Vaccine requirement for 12th graders

The state of Ohio requires all students entering the 12th grade to have a second dose of meningococcal vaccine (also known as MCV4, Menevo or Menactra). If the first dose of meningococcal vaccine was administered on or after the 16th birthday, a second dose is not required.

Meningococcal meningitis

Meningococcal meningitis is a rare but serious disease that develops rapidly and can claim a life in as little as one day. Of those who survive, approximately one in five are left with serious medical problems like amputation, deafness, and brain damage. Teens are at increased risk of meningococcal meningitis.

This increased risk may be due to activities like sharing utensils and kissing.

You may obtain these vaccines from your child's health care provider or other community resource. Vaccines are also available at your local health department.

Students who do not provide documentation of these immunizations before the start of the 2020-2021 school year will not be given class schedules in August. At this time, forms can be mailed to the high school at 777 E. Union St., Medina, Ohio 44256, Attn: S. White, faxed to 330-636-3802, or emailed to whites@medinabees.org. If there are medical/religious or philosophical reasons your child cannot receive immunizations, please contact the school clinic for an Immunization Exemption Form.

Thank you,

Trisha Large BSN, RN
