

Medical Career Night

Overall employment in healthcare occupations is projected to grow 13 % from 2021 to 2031, much faster than the average for all occupations; this increase is expected to result in about 2 million new jobs over the decade.

In addition to new jobs from growth, opportunities arise from the need to replace workers who leave their occupations permanently. About 1.9 million openings each year, on average, are projected to come from growth and replacement needs.

Come to Medical Career Night to explore occupations that help clients maintain and improve wellbeing.
